DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13, drawn to a method for continuous determination of a target analyte, classified in class 435, subclass 7.9.
 - II. Claims 14-16, drawn to a method for determining a target analyte, classified in class 436, subclass 518.
 - III. Claim 17, drawn to a method for intermittently or continuously conducting immunoassay measurements, classified in class 436, subclass 514.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation as shown by the different method steps and components recited in each of the methods in each group.

Art Unit: 1641

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
